

March 14-15 2018, Munich, Germany, Hell B0, Booth 101

Meet Us at LOPEC 2018: Shorter Printed Electronics Development Process

New approach - from R&D, through prototyping to mass production:

Sicrys™ conductive inks portfolio

Single crystal nano-metric Silver or Copper based inks built to enhance performance, be environmentally friendly and reduce costs. A perfect solution for digital mass production printed electronics applications.

A prototype of the Integrated Printer

The first inkjet printer to be specifically developed for Printed Electronics design, prototyping, process development and R&D– The integrated printer includes printing, drying, sintering, inspection and parallel printing of up to ten types of inks.

Meet us at Hall B0, Booth 101
